## ABOUT ME

---

A junior full stack developer specialising in React, PHP and Laravel. With training in Git and Agile methodology. I have used all the fundamental languages such as HTML, CSS and JavaScript throughout all of my projects.

With a history in Graphic design and Marketing, I have a wide skillset perfectly tailored for business development - allowing me to help businesses perfect how they interact and communicate with their audiences online. Couple that with my interest into user psychology and research into subconscious consumption - I would make a great asset to any team of developers.

## EDUCATION

---

### SOFTWARE DEVELOPER ESSENTIALS

IO ACADEMY 2025

An intensive learning course where I learned to build as a full stack developer - using my skills in solo, pair and mob programming to build everything from library websites to product APIs.

### BA HONS GRAPHIC DESIGN

UWE 2018-2021

Awarded a first class with honours for my research into the digital graphic applications of climate awareness materials and the iteration of internalised misogyny.

### FOUNDATION DEGREE

ROYAL WEST OF ENGLAND ACADEMY 2017-2018

Awarded a distinction for my digital and 3D work on gender constructs.

### GCSES AND ALEVELS

BACKWELL ACADEMY 2010-2017

GCSEs: Awarded 12 between the grades of A\*-C including English and Maths.

ALEVELs: Awarded 4 between the grades of A\*-C including; Graphic Design, Fine Art, Media Studies and English Language.

## RELEVANT EXPERIENCE

---

### BOOKSHELF APP

HTMLEPHANTS 2025

Working as part of a software team, I was a part of building a web app allowing allowing users to view available books, search for books by name, filter books by genre, view claimed books, claim a book themselves, review books and even add new books to the system. This was invaluable for teaching me how to effectively drive and navigate in pair-programming and work as a wider dev team using agile methodology and Git.

### FREELANCE DIGITAL MARKETING MANAGER

GONE MAD MARKETING 2020-2025

From educational institutes to small businesses, I have worked with a huge range of clients over the years communicating with people on all levels from CEOs to freelancers - working on everything from SEO to UX, branding and paid media. Teaching myself the necessary skills to be a digital marketer in an industry that is developing and changing at such a pace and expanding on my skillset to continue to provide the best level of service possible.

Perfecting this self initiation has taught me so many lessons and allowed me to learn so many technical skills which have come to be invaluable in every role I apply myself in.

### GRAPHIC DESIGNER AND DIGITAL MARKETER

BOOMSATSUMA 2022-2023

Here I headed up the internal department - outsourcing to agencies for PR and Web Development. I re-designed their brand identity, designed a new website using wireframes with new digital assets and directed a hero film to procure new business.

### DIGITAL MARKETING ASSISTANT

ARV SOLUTIONS 2020-2022

Here I learned how to single-handedly manage a workload while collaborating with different departments to deliver projects and meet deadlines for the needs of the business. This role taught me the value of effective communication when working across departments to ensure precise delivery of projects, without miscommunication.
